Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 1, 2, and 4-7 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Arff (4492047).

Arff dicsloses a method for manufacturing a sole comprising providing a receptacle (12) with two locking means (16 and 17) for a stud with an oblong projection (18), and injection molding a sole (10) around the receptacle (see column 4 lines 30-35) as claimed.

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Arff.

Arff shows a method substantially as claimed except for the exact method of forming the receptacle. Official notice is taken that it is extremely well known and conventional to form plastic elements by injection molding. It would have been obvious to form the receptacles by injection molding as is well known and conventional in the method of Arff to provide a quick and inexpensive method of making the receptacles.

Application/Control Number: 10/688,793 Page 3

Art Unit: 3728

5. Claims 1-9 and 16-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Swindle (6050006) in view of either Arff (4492047) or Okamoto (5386651).

Swindle shows a shoe with a stud base/sole (12), a receptacle (14) with a flexible wall (top discussed in column 4 lines 9-25) with a first locking means (34) located on the flexible wall, and a stud (18) with an oblong locking member (24, column 3 line 47) substantially as claimed except for the exact method of attaching/forming the sole with the receptacles. Either Arff or Okamoto teaches injection molding a sole around stud receiving receptacles to provide a secure attachment between the receptacles and the sole. It would have been obvious to injection mold the sole around the receptacles as taught by either Arff or Okamoto in the shoe and method of Swindle to provide a more secure attachment between the receptacles and the sole.

In reference to claim 3, Swindle as modified above shows a method substantially as claimed except for the exact method of forming the receptacle. Official notice is taken that it is extremely well known and conventional to form plastic elements by injection molding. It would have been obvious to form the recepatcles by injection molding as is well known and conventional in the method of Swindle as modified above to provide a quick and inexpensive method of making the receptacles.

Allowable Subject Matter

6. Claims 10-13 and 15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3728

Conclusion

7. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

1. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). Other useful information can be obtained at the PTO Home Page at www.uspto.gov.

In order to avoid potential delays, Technology Center 3700 is encouraging FAXing of responses to Office Actions directly into the Center at (572)272-8300 (FORMAL FAXES ONLY). Please identify Examiner Marie Patterson of Art Unit 3728 at the top of your cover sheet.

Any inquiry concerning the MERITS of this examination from the examiner should be directed to Marie Patterson whose telephone number is (571) 272-4559. The examiner can normally be reached from 6AM - 4PM Mon-Wed.
